

Launch Latin American Regional Chapter

We are very excited to announce the launch of the **SPRINT Robotics Latin American Regional Chapter (SRLA)** in 2023! The addition of this new region strengthens SPRINT Robotics' mission to promote the global acceptance and use of robotics for Inspection and Maintenance. Throughout the spring we have a few activities planned, leading to the official launch at the end of June.

Maurício Galassi from Petrobras will lead the chapter as SRLA Coordinator and Peter Voorhans will be the SRLA Program Manager. Petrobras, which is based in Brazil, joined SPRINT Robotics in 2022 and will play a leading role in getting the chapter established in the region. Other members of the SRLA Steering Committee are SBM Offshore and Senai Cimatec.

“SRLA will increase integration between Latin American and global robotics initiatives for Inspection & Maintenance, promoting business opportunities and equipment availability. Regional editions are an important tool for technology dissemination.”

Maurício Galassi | Petrobras
