

SRLA LAUNCH

LATIN AMERICAN REGIONAL CHAPTER

JUNE 28-29, 2023 | RIO DE JANEIRO

Latin American Regional Chapter Launch

Join the SPRINT Robotics Latin American Regional Chapter (SRLA) on June 28 to 29, 2023, held at the Petrobras Cenpes Convention Center in Rio de Janeiro. There will be a host of meetings and exciting events like industry speed dating on the first day, which is an excellent way for growing and building your network in the region.

We are also delighted to announce that the official ceremonies will take place at the Networking Dinner on June 28th, at Fogo de Chão Botafogo restaurant. Enjoy the company of friends and colleagues from the industry while savoring authentic Brazilian cuisine and drinks along the picturesque Botafogo Bay.

Both days promise to be very interesting and impactful in terms of knowledge sharing with a distinguished line-up of industry speakers such as John O'Brien from IRCinspect & HIBOT, Rodrigo Farjala of Cybernetix, Diego Juliano from Shell, Mauricio Galassi from Petrobras, and much more. See the right solution for your business by viewing our exhibition area showcasing the leading I&M robotics solutions providers who are eager to demonstrate their products from across the world.
